PROFESSIONAL EXPERIENCE

COMERIVER LIMITED

IT intern | September 2019 – March 2020

- **Website design and maintenance:** I designed new websites and maintained the company's websites. I worked with the software team in the creation of websites and apps for clients. I worked remotely in **development of content management framework themes for PageCarton** using HTML, CSS, PHP and Js knowledge to help anybody to create their own website easily with no code in 30 minutes using the created themes.
- **Data gathering and analysis:** We collected data on coding and access to technology among teenagers in Nigeria, I was able to assist with importation and analysis with the support of other team members using the Microsoft excel sheet and other applications. I collected all interns' daily reports and entered new customer details into Ms Excel datasheets. I also managed the clients'

database and updated changes in already entered clients' data. Manage the **email marketing** strategy for the company.

- **Social Media Manager:** with my proactive skill with social media handling, I managed all social media pages and **created a digital marketing strategy for each handles**. I handled the email list and contacts and sent out newsletters and engagements. I follow up with clients enquiry on social pages increasing engagement.
- **Program management:** worked together with a **team of four to prepare and hold the monthly Bootcamp for PageCarton** and worked on publicity, engagement, posts about the event which in return increase number of registered candidate by 80%. I headed this team. I also **facilitate the beginners session of the Bootcamp** training candidate building blocks of websites development and design and also graphics, Canva, and digital marketing following the syllabus given.
- **Electrical maintenance officer:** I handled weekend electrical maintenance work with the power department of the company
- I extracted registered clients' data from the website database to an Excel sheet for use.

Mainstream Green Energies Solution Ltd

Field Technician | September 2019 – December 2021

- **Solar system Installation:** I handled installations and electrical connections for teams in accomplishing complete solar system installations at various sites in Nigeria.
- **Electrical Wiring:** With proficient skill in electrical wiring, I helped in load separations on distribution boards on various sites and also the installation of panels on various housetops on various sites.
- **Brand Ambassador:** I was eventually made one of the company's brand ambassadors where I represent the company day to day works on my page and also the company's page that in return **increase the company's client conversion rate** and **profit margins** on all services.

African Development and Empowerment Foundation (AfricanDEF)

Volunteer | 2018 – present

- I **designed the best graphics for online enlightenment sessions** and outreaches
- **Graphic design and printing:** I volunteered in the graphic design section of the organization in designing the best graphics for online enlightenment sessions. I also helped in printing documents, hospital cards, files and banners.
- **Technology consultant:** I provided technology consultation for any tech-related topics.
- Also, a moderator for online awareness programs on Zoom, Facebook. I facilitated and enhanced online awareness programs on Zoom, Facebook and worked with groups of volunteers and staff for the success of field outreaches in schools and marketplaces. Also **worked as one of the**

moderator in online sessions for #Health4Tech, @AfricanDEF on Facebook, Instagram and WhatsApp.

Ubuntu Future – Contents Creation and Development Group

Volunteer | 2018 – present

- With content creation skills, I work together with the team in putting together a masterpiece for all memorable day articles and online social media content.
